New Jersey East Coast Greenway

Multi-use Trail Guide

East Coast Greenway

New Jersey Department of Transportation

U.S. Department of Transportation
Federal Highway Administration

Welcome to the East Coast Greenway!

The East Coast Greenway (ECG) is a 3,000 mile trail system linking 25 major cities from Maine to Florida. As a pathway to health and adventure for non-motorized travelers including walkers, cyclists, skiers, skaters, equestrians, and wheelchair users, it links together publicly owned, firm-surface trails.

For the 30 million Americans who live near the route and for millions of visitors, the ECG is emerging as a safe, traffic-free route for exercise, recreation, transportation and tourism.

The East Coast Greenway Alliance (ECGA) in Wakefield, RI spearheads the project. With its partners at the local, state, and national levels, the ECGA is creating a legacy for America.

The East Coast Greenway in New Jersey

In New Jersey, the ECG runs 78 miles between Pennsylvania and New York, passing through major urban areas – Trenton, Princeton, New Brunswick, Newark, and Jersey City – as well as rural and suburban communities.

New Jersey has made great strides to locate the ECG off-road and, with more than half of its route now completed as off-road trails, the state distinguishes itself nationwide as a leader in that category. These trails include the 35-mile D&R Canal State Park from Trenton to New Brunswick. New Jersey's remaining 47 percent is still on road for now, of which about 16 percent is in development to become off-road over the next few years. The ECG through New Jersey generally follows rivers, providing a relatively level alignment without major steep grades.

This guide allows users to easily follow the current travel route of the ECG across New Jersey. The directions include turn-by-turn details to travel the ECG in either direction. The maps display both the current route and any locations where the long-term proposed route diverges.

About this guide

The New Jersey Department of Transportation (NJDOT) has published this guide with assistance from the East Coast Greenway Association to help ECG travelers plan a safe and enjoyable trip.

Route Conditions

Although every attempt has been made to select paths and roadway segments that can provide quality walking and bicycling experiences, some route segments may have adverse conditions, for example, deteriorating pavements. Newly-resurfaced roadways, and new developments lead to increased traffic. The route's conditions listed were effective at this printing.

The goal of the ECG is to be entirely off-road and open to all non-motorized users, but much of the route is still on road and conditions are not appropriate for all uses. Some of the on-road portions are suitable only for experienced cyclists, and some of the off-road segments are unpaved and less comfortable for narrow tire bicyclists. Equestrians are permitted on certain off-road trails where noted.

Route Navigation

As the Greenway grows, the East Coast Greenway Alliance is placing wayfinding signage along the route to help travelers. Look for the blue and green ECG signs.

Over time, this route will change as more off-road trails are built. Check www.greenwaynj.org for updates.

Contact us

Your comments will be useful in updating or revising this route.

Bicycle.advocate@dot.state.nj.us
or info@greenway.org

Safety Tips

Be aware of traffic patterns
Plan trips to avoid peak traffic hours.

Obey the rules of the road
In New Jersey, a bicyclist has the same rights and responsibilities as a motor vehicle driver.
Cyclists must:

Keep right.
Ride with traffic, not against it.
Obey all traffic signs and signals.

Use signals
Show your intention clearly before turning and changing lanes.

Always wear your helmet
All bicyclists 17 years old and under must wear an approved helmet. It's the law in New Jersey.

Share the road/trail
Be aware of and respect the rights and safety of other road and trail users.

Public Transportation

Taking the bus, train or ferry can simplify your trip by eliminating the need to double back to your start point or to make special travel arrangements. Public transportation may also be useful during bad weather or in difficult situations.

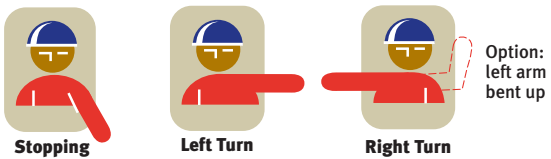
Many locations along the ECG are easily accessible by transit. As with the majority of the ECG, the route generally follows the AMTRAK east coast corridor. There are also numerous NJ TRANSIT train and bus routes, as well as ferry terminals with service to New York City. See the maps and directions for details throughout the NJ ECG alignment. For mass transit schedules and bike access information contact:

Bus, train: www.njtransit.com or call 800.772.2222
Train: www.amtrak.com or call 800.USA.RAIL ~ 800.872.7245
PATH train: www.panynj.gov/path or call 800.234.PATH
Ferry: www.nywaterway.com or call 800.533.3779

Navigating the road

Use hand signals in advance of your turn

Be predictable. Let drivers know your intentions.

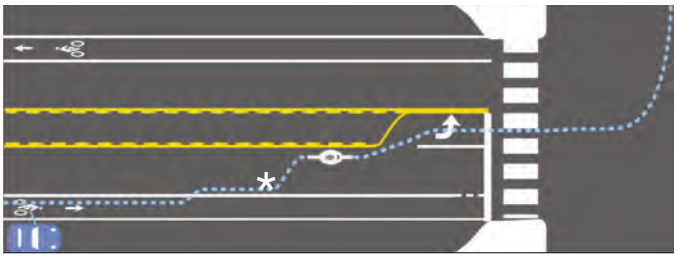


Ride in a straight line

Avoid weaving in between lanes. Drivers cannot position themselves to pass if they cannot predict your behavior.

Make a left turn: Two ways

- While riding, turn left from the far left lane.



* Scan for traffic

- Walk the bike across the intersection.

East Coast Greenway

The New Jersey Department of Transportation published the *NJ ECG Multi-use Trail Guide* with funds from the Federal Highway Administration.

The RBA Group prepared the maps with Steve Spindler Cartography.
